

HILL COUNTRY SOFTWARE BECOMES OEM DISTRIBUTOR OF THE COPSYNC SERVICE

COPsync Building a Nationwide Network of Distributors Committed to Real-Time Data Interoperability

DALLAS, TEXAS, October 26, 2010 (BUSINESS WIRE) -- COPsync Inc. (COYN.OB) announced that the company has licensed Hill Country Software and Support, Inc., an information technology vendor to state and local government and law enforcement, to be a distributor of the COPsync field-based reporting and information-sharing network. Hill Country sells and supports county and municipal government accounting, court management, tribal court management, CJIS reporting, vehicle inventory tax, and law enforcement systems.

“We welcome Hill Country to our existing network of distributors and resellers,” said Herbert Severin, Vice President for Strategic Business Relations of COPsync. “COPsync is dedicated to building a nationwide network of the best of the estimated 2100 vendors supplying information technology to the law enforcement industry. We plan to integrate our service with the information systems of these select vendors – to produce a nationwide network of distributors committed to real-time data interoperability. Hill Country has a broad product set, robust technology and a substantial customer base in key industry sectors, making them an obvious choice for inclusion in our distributor network.”

“The integration between Hill Country and COPsync will produce a complete and powerful law enforcement package that we are excited to offer agencies in Texas and beyond,” said Jim Stateczny, President of Hill Country Software and Support, Inc. “The new features will not only increase safety in the field for the officers, but will also increase efficiency and accuracy in reporting and managing the data collected.”

“Lack of information sharing among law enforcement agencies is a well-documented problem in the United States,” said Ronald A. Woessner, COPsync chief executive officer. “Hill Country’s substantial customer base in Texas further solidifies our position as the information sharing network of choice among law enforcement agencies in Texas. The nationwide network of distributors that we are building, who are committed to real-time data interoperability, will help us leverage our success in Texas to extend the company’s geographical footprint throughout the United States.”

About Hill Country Software and Support, Inc.

Hill Country Software and Support, Inc. has provided software solutions for county and municipal agencies for 30 years. Operating in ten states and primarily in Texas, three generations have worked hard to build a reputation of unbeatable software and customer support. HCSS provides local governments with programs for law enforcement, court management, budgetary accounting, and vehicle inventory tax. HCSS listens to its customers and has developed software that handles the data management and reporting needs of the agencies while still being user-friendly and responsive to the operations of each office. HCSS also offers law enforcement agencies a records management system (RMS), jail management system (JMS), and computer aided dispatch (CAD). For more information, visit www.hillcountrysoftware.com.

About COPsync, Inc.

COPsync, Inc. (COYN.OB) markets and licenses a field-based reporting and information-sharing service that enables officers to collect, report and share critical data in real-time at the point of incident and obtain instant access to various local, state and federal law enforcement databases. The COPsync service also eliminates manual processes and increases officer productivity by enabling officers to electronically write tickets, process DUI and other arrests and incidents and document accidents. It also saves lives, reduces unsolved crimes and assists in apprehending criminals -- through such features as a nationwide officer safety alert system, GPS/auto vehicle location and distance-based alerts for crimes in progress, such as child abductions, bank robberies and police pursuits. The service provides law enforcement agencies the means to be proactive instead of reactive in nature. For more information, please visit www.copsync.com.

FORWARD-LOOKING STATEMENTS

Statements in this release that are not purely historical facts or that necessarily depend upon future events, including forecasts of revenue or earnings, or other statements about anticipations, beliefs, expectations, hopes, intentions or strategies for the future may be forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Examples of these forward-looking statements include Mr. Woessner's statement, "...Hill Country's substantial customer base in Texas further solidifies our position as the information sharing network of choice among law enforcement agencies in Texas. The nationwide network of distributors that we are building, who are committed to real-time data interoperability, will help us leverage our success in Texas to extend the company's geographical footprint throughout the United States." Readers are cautioned not to place undue reliance on forward-looking statements. All forward-looking statements are based upon information available to COPsync on the date this release was issued. COPsync undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Any forward-looking statements involve risks and uncertainties that could cause actual events or results to differ materially from the events or results described in the forward-looking statements, including risks or uncertainties related to COPsync's ability to raise capital to sustain operations, to obtain market acceptance for our service offering and to establish and maintain strategic and distribution relationships to gain customers and grow revenues; COPsync customers' ability to obtain government grants to acquire the company's services; and risks associated with the effect of changing economic conditions, product market trends, variations in the company's cash flow, market acceptance risks, technical development risks, and seasonality. COPsync may not succeed in addressing these and other risks. Further information regarding factors that could affect COPsync's financial and other results can be found in the risk factors section of COPsync's most recent filing on Forms 10-K and 10-Q with the Securities and Exchange Commission.
